ETF positions total				**1,439,703 shares**	**99.998865%**	
Residual cash (USD)					0.001135%	
Portfolio total					**100.000000%**	

Implementation and cash reconciliation

Why actual weights differ from 11.111111%. For each ETF, the target dollar allocation is USD 100 million / 9. Bloomberg positions must be entered in whole shares. The number of shares was therefore rounded down to the largest integer not exceeding the target investment at the 16 October closing price. Actual weights equal shares x closing price / USD 100 million.

Why residual cash remains. The nine ETF purchases total **USD 99,998,865.07**; the remaining **USD 1,134.93 (0.001135%)** stays as non-interest-bearing USD cash. This is a mechanical consequence of whole-share implementation, **not a discretionary or strategic cash allocation**.
